Table of Contents

VOLUME 85 (EMG & Motor Control), 1992

MAIN ARTICLES

Noninvasive mapping of muscle representations in human motor cortex
E.M. Wassermann, L.M. McShane, M. Hallett and L.G. Cohen (U.S.A.) 1

Topographic mapping of the human motor cortex with magnetic stimulation: factors affecting accuracy and reproducibility
J.P. Brasil-Neto, L.M. McShane, P. Fuhr, M. Hallett and L.G. Cohen (U.S.A.) 9

Magnetic brain stimulation with a double coil: the importance of coil orientation
K.R. Mills, S.J. Boniface and M. Schubert (U.K.) 17

Relevance of stimulus duration for activation of motor and sensory fibers: implications for the study of H-reflexes and magnetic stimulation
M. Panizza, J. Nilsson, B.J. Roth, P.J. Basser and M. Hallett (U.S.A., Italy) 22

Jitter measurement by axonal micro-stimulation. Guidelines and technical notes
J.V. Trontelj and E. Stålberg (Slovenia, Sweden) 30

Motor evoked potentials: a new method of controlled facilitation using quantitative surface EMG
C.L. Lim and C. Yiannikas (Australia) 38

Normal conduction in pathways traversing an asymptomatic multiple sclerosis plaque
M.A. Ross, A.A. Leis, L. Krain and G. Mitchell (U.S.A.) 42

Effects of fatigue on the stretch reflex in a human muscle
C. Balestra, J. Duchateau and K. Hainaut (Belgium) 46

Physiological analysis of motor reorganization following lower limb amputation
P. Fuhr, L.G. Cohen, N. Dang, T.W. Findley, S. Haghighi, J. Oro and M. Hallett (U.S.A.) 53

The effects of cooling supplementary motor area and midline cerebral cortex on neuronal responses in area 4 of monkeys
E.M. Schmidt, R. Porter and J.S. McIntosh (U.S.A.) 61

Slow positive dorsal cord potentials activated by heterosegmental stimuli
K. Shimoji, Y. Sato, S. Denda, T. Takada, S. Fukuda and T. Hokari (Japan) 72

Magnetoelectrical stimulation of motor cortex in children with motor disturbances
K. Müller, V. Hömberg, A. Aulich and H.G. Lenard (F.R.G.) 86

Afferent conditioning of motor evoked potentials following transcranial magnetic stimulation of motor cortex in normal subjects
T. Kasai, K.C. Hayes, D.L. Wolfe and R.D. Allatt (Canada) 95

Reinforcement of subliminal flexion reflexes by transcranial magnetic stimulation of motor cortex in subjects with spinal cord injury
K.C. Hayes, R.D. Allatt, D.L. Wolfe, T. Kasai and J. Hsieh (Canada) 102

Percutaneous magnetic stimulation of the motor cortex in migraine
A. Maertens de Noordhout, J.L. Pepin, J. Schoenen and P.J. Delwaide (Belgium) 110

The heating of metal electrodes during rapid-rate magnetic stimulation: a possible safety hazard
B.J. Roth, A. Pascual-Leone, L.G. Cohen and M. Hallett (U.S.A.) 116

Motor axon reflex and indirect double discharge: ephaptic transmission? A reappraisal
M.R. Magistris and G. Roth (Switzerland) 124

Relief of hemiparetic spasticity by TENS is associated with improvement in reflex and voluntary motor functions
M.F. Levin and C.W.Y. Hui-Chan (Canada) 131

Diagnostic function of the Microhuman prototype of the expert system — MUNIN
S. Andreassen, B. Falck and K.G. Olesen (Denmark, Finland) 143

Turn and phase counts of individual motor unit potentials: correlation and reliability
G. Pfeiffer and K. Kunze (F.R.G.) 161

The influence of muscle length on muscle fibre conduction velocity and development of muscle fatigue
L. Arendt-Nielsen, N. Gantchev and T. Sinkjær (Denmark, Bulgaria) 166

Nerve conduction in the hands of vibration exposed workers
T. Brismar and L. Ekenvall (Sweden) 173

Contralateral influences on triceps surae motoneuron excitability
D.M. Koceja and G. Kamen (U.S.A.) 177

Activation of the neck muscles from the ipsi- or contralateral hemisphere during voluntary head movements in humans. A reaction-time study
L. Mazzini and M. Schieppati (Italy) 183

Antagonist muscle inhibition before rapid voluntary movements of the human wrist
R. Agostino, M. Hallett and J.N. Sanes (U.S.A.) 190

Motor responses evoked by magnetic brain stimulation in Huntington's disease
B.-U. Meyer, J. Noth, H.W. Lange, C. Bischoff, J. Machetanz, A. Weindl, S. Röricht, R. Benecke and B. Conrad (F.R.G.) 197

Electroencephalography and clinical Neurophysiology, 85 (1992) 436–438

Activation of the neck muscles from the ipsi- or contralateral hemisphere during voluntary head movements in humans. A reaction-time study
L. Mazzini and M. Schieppati (Italy) 183

Antagonist muscle inhibition before rapid voluntary movements of the human wrist
R. Agostino, M. Hallett and J.N. Sanes (U.S.A.) 190

Motor responses evoked by magnetic brain stimulation in Huntington's disease
B.-U. Meyer, J. Noth, H.W. Lange, C. Bischoff, J. Machetanz, A. Weindl, S. Röricht, R. Benecke and B. Conrad (F.R.G.) 197

Electrical stimulation of motor cortex in experimental cortical ischaemia: pyramidal responses at C_5 and the surface EMG
X. Liu, N.M. Branston, M. Kawauchi, D.A. Jellinek and L. Symon (U.K.) 209
Magnetic brain stimulation and brain size: relevance to animal studies
J.D. Weissman, C.M. Epstein and K.R. Davey (U.S.A.) 215
The effects of maturation on spontaneous eye movements in the macaque monkey
C. Lucchetti and D. Cevolani (Italy) 220
Changes in motor and sensory nerve conduction parameters with temperature in normal and diseased nerve
P. Dioszeghy and E. Stålberg (Sweden) 229
Human startle reflex: technique and criteria for abnormal response
S. Chokroverty, T. Walczak and W. Hening (U.S.A.) 236
Repetitive doublets of human motoneurones: analysis of interspike intervals and recruitment pattern
L.P. Kudina and N.L. Alexeeva (Russia) 243
Motor potentials of inferior orbicularis oculi muscle to transcranial magnetic stimulation. Comparison with responses to electrical peripheral stimulation of facial nerve
A. Ghezzi, L. Callea, M. Zaffaroni and A. Zibetti (Italy) 248
Determining the site of stimulation during magnetic stimulation of a peripheral nerve
J. Nilsson, M. Panizza, B.J. Roth, P.J. Basser, L.G. Cohen, G. Caruso and M. Hallett (Italy, U.S.A.) 253
Cerebello-frontal cortical projections in humans studied with the magnetic coil
V.E. Amassian, R.Q. Cracco, P.J. Maccabee and J.B. Cracco (U.S.A.) 265
Inhibitory period following motor potentials evoked by magnetic cortical stimulation
T. Uozumi, Y. Ito, S. Tsuji and Y. Murai (Japan) 273
Analysis of the coil generated impulse noise in extracranial magnetic stimulation
S.A. Counter and E. Borg (U.S.A., Sweden) 280
Modelling magnetic coil excitation of human cerebral cortex with a peripheral nerve immersed in a brain-shaped volume conductor: the significance of fiber bending in excitation
V.E. Amassian, L. Eberle, P.J. Maccabee and R.Q. Cracco (U.S.A.) 291
Facilitation of motor evoked potentials by somatosensory afferent stimulation
V. Deletis, J.H. Schild, A. Berić and M.R. Dimitrijević (U.S.A.) 302
The contribution of magnetic stimulation of the motor cortex to the diagnosis of cervical spondylotic myelopathy. Correlation of central motor conduction to distal and proximal upper limb muscles with clinical and MRI findings
V. Di Lazzaro, D. Restuccia, C. Colosimo and P. Tonali (Italy) 311
The relation between functional deficits, motor and sensory conduction times and MRI findings in syringomyelia
H. Masur, C. Oberwittler, G. Fahrendorf, P. Heyen, G. Reuther, S. Nedjat, A.C. Ludolph and G.G. Brune (F.R.G., U.S.A.) 321
The influence of the shape of mechanical stimuli on muscle stretch reflexes and SEP
A. Spitzer and D. Claus (Germany) 331
Recovery functions of common peroneal, posterior tibial and sural nerve somatosensory evoked potentials
T. Saito, T. Yamada, A. Hasegawa, Y. Matsue, T. Emori, H. Onishi and T. Fuchigami (U.S.A.) 337
After-potentials and control of repetitive firing in human motoneurones
L.P. Kudina and N.L. Alexeeva (Russia) 345
Human motor evoked responses to paired transcranial magnetic stimuli
J. Valls-Solé, A. Pascual-Leone, E.M. Wassermann and M. Hallett (U.S.A.) 355
Early and late lower limb motor evoked potentials elicited by transcranial magnetic motor cortex stimulation
M.R. Dimitrijević, M. Kofler, W.B. McKay, A.M. Sherwood, C. Van der Linden and M.A. Lissens (U.S.A., Austria, Belgium) 365
Transcranial cortical stimulation. Late excitability changes in the soleus and anterior tibial motoneurone pools
H. Holmgren, Z. Kadanka and L.-E. Larsson (Sweden, Czechoslovakia) 374
Cortical projection to erector spinae muscles in man as assessed by focal transcranial magnetic stimulation
A. Ferbert, D. Caramia, A. Priori, L. Bertolasi and J.C. Rothwell (U.K.) 382
Assessment of corticospinal and somatosensory conduction simultaneously during scoliosis surgery
D. Burke, R. Hicks, J. Stephen, I. Woodforth and M. Crawford (Australia) 388
Suppression of cutaneous perception by magnetic pulse stimulation of the human brain
M. Seyal, L.K. Masuoka and J.K. Browne (U.S.A.) 397
Simultaneous electromyography and ^{31}P nuclear magnetic resonance spectroscopy — with application to muscle fatigue
P. Vestergaard-Poulsen, C. Thomsen, T. Sinkjær, M. Stubgaard, A. Rosenfalck and O. Henriksen (Denmark) 402
Mechanical properties of human ankle extensors after muscle potentiation
T. Sinkjær, N. Gantchev and L. Arendt-Nielsen (Denmark) 412
Supraspinal influences on recurrent inhibition in humans. Paralysis of descending control of Renshaw cells in patients with mental retardation
A. Rossi, B. Decchi and V. Vecchione (Italy) 419

SHORT COMMUNICATIONS

Silent period measurement revives as a valuable diagnostic tool with transcranial magnetic stimulation
B.A. Haug, P.W. Schönle, C. Knobloch and M. Köhne (F.R.G.) 158
Abnormal sympathetic skin responses in thalamic lesions
P. Montagna, P. Cortelli, P. Avoni, L.P. Marchello, L. Monari, P. Tinuper, P. Gambetti and E. Lugaresi (Italy, U.S.A.) 225

Central motor conduction in relation to contra- and ipsilateral activation
M.J. Zwarts (The Netherlands) 425

INVITED EDITORIAL

The clinical usefulness of magnetic cortical stimulation
N.M.F. Murray (U.K.) 81

BOOK REVIEW

Magnetic motor stimulation. Basic principles and clinical experience. Electroenceph. clin. Neurophysiol., Suppl. 43
edited by W.J. Levy, R.Q. Cracco, A.T. Barker and J.C. Rothwell 289

Society Proceedings 1P

Announcement from the Publisher 228, 354, 34P

Index of Authors to Volume 85 (1992) 429
